Please review the EHR changes that are relevant to your role.

**Who's Affected**

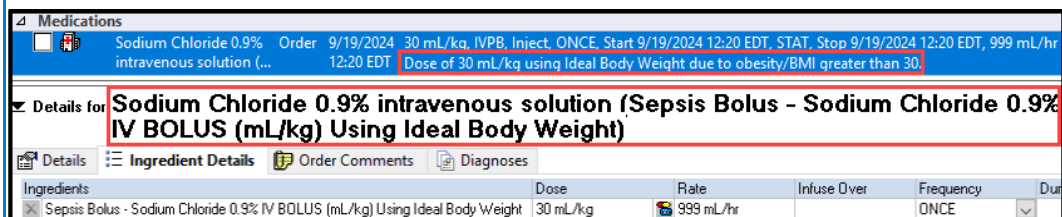

**Location:** All locations, excluding CHX

- Hospital providers
- Emergency Department providers

**Change Description**
**New Sepsis Ideal Body Weight (IBW) Bolus**

The Sepsis Ideal Body Weight Bolus is available for single-order entry or selection within the Sepsis Advisor. This order uses the IBW calculation and includes the CMS documentation requirements for patients with a BMI greater than 30.

- **The dose calculator will default to IBW if a height and weight have been documented.**
- The required documentation is automatically included in the order sentence.
- Sepsis Bolus options for Normal Saline or Lactated Ringers are now: Ideal Body Weight, Reduced Volume, and the Standard 30mL/Kg.

**When:** Currently Available
